NAME

    fgid -- find group id

SYNOPSIS

    fgid(group)
    char *group;

DESCRIPTION

    Fgid looks in the /etc/group file for a given group name and returns the numerical group id if found, or,

        -1 - if it cannot find group

        -2 - if it cannot open /etc/group

    The standard I/O subroutine **getgrnam(3)** is used which uses **malloc(3)**

LIBRARY

    /lib/lib1.a

FILES

    /etc/group

SEE ALSO

    fgname(3), getgrnam(3)
