

ADDUSER (a)

ADDUSER (a)

NAME

adduser — increment user count on a process

SYNOPSIS

(adduser = 43.)

adduser(process)

int process; /* process number */

DESCRIPTION

Adduser increments the user count on the process specified by *process*. This is used by the process manager to increment the user count on a process. A 1 is returned from C for a successful call.

SEE ALSO

DIAGNOSTICS

A - 1 is returned from C if the process does not exist.
